

# eGraph

the graphical solution for Microsoft Business Solution-Axapta

## MPS Graphics

MPSG provides the most advanced ERP solutions to the graphical industry, based on Microsoft's platforms.

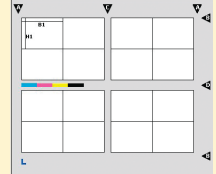

We develop and deliver our products directly from our offices in Scandinavia or through our partners worldwide.

With offices in three Scandinavian countries and more than 275 installations we are the leading solution provider on the market

## Pre calculation

The calculation module provides a very flexible tool to give you precise and detailed information about the job.

- Work flows
- Time consumption
- Paper consumption
- Ink consumption
- Automatic impositions
- Pictures of necessary tools
- Handling of "what if ..."

Change the circulation or the number of pages, and all the processes will be recalculated and new prices will be displayed.

## Axapta eGraph

eGraph is a complete ERP solution with comprehensive functionality to manage your entire business.

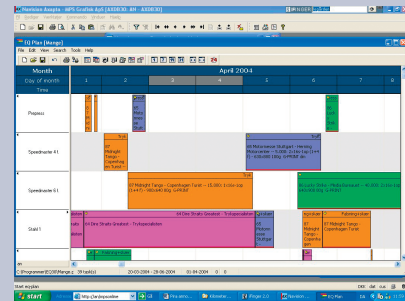

eGraph is designed to the following businesses:

- Prepress
- Sheet print
- Web print
- Label print
- Packaging print
- Flexo print
- Finishing

## Order and planning

The advanced planning module provides a complete overview of all jobs in progress. The plan can be rearranged in the gantt-chart with "drag 'n drop". The job will be completely recalculated if the job description is changed.

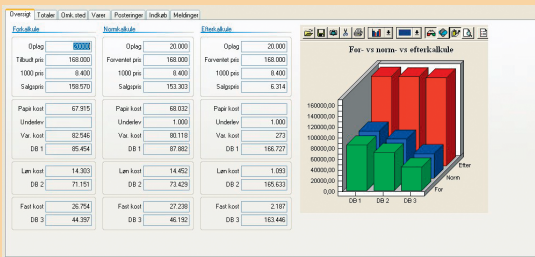

eGraph Online is a web based job information system, providing job information and well arranged production outlines. Time- and material consumption is registered in a logical way and it updates order plans and after-calculations.

## Modules

eGraph is fully integrated with Microsoft Axapta and includes:

- Pre calculation
- Order
- Resource planning
- Gantt chart
- eGraph Online (shop floor control)
- Work in progress
- After calculation
- Statistics
- Document handling

## JDF

MPSG is a full member of the CIP4 organization. eGraph is the perfect MIS for JDF/JMF integration because the system is based on Microsoft's most advanced MIS: Microsoft Axapta. The structure of the system makes it possible to obtain the highest possible level of integration with your graphical equipment. If your company has an advanced JDF/JMF strategy, eGraph will be the perfect MIS platform.
